

Pitch Perfect

Objective: The goal is to work together as a group to invent an item that would benefit students on campus. This will show how well the candidates work as a team, who takes charge, who steps back, if they can complete a task in a manageable time, and the communication skills of the individuals in the group.

Instructions: In the **Pitch Perfect** activity, you will work in a small group to come up with an invention that solves an everyday problem on campus. You will have 5 minutes to identify a challenge students face, then brainstorm and design a creative solution. After deciding on your invention, you will then present a short 1-2 minute pitch explaining the problem, how your invention works, and why it would be helpful to students.

Items needed: Timer, poster board, markers
